JānorPot® **Round Containers & Filling Trays**

Summit's JānorPot® brand of polypropylene round pot system is an innovative, automation friendly, and branding powerhouse. With the introduction of JānorPot®, Summit was the first to offer a full line of thermoformed, thin walled round pots produced in the United States. Proven European design features have made this system an outstanding favorite for automation, growing and branding. Featuring a smooth rolled lip with no sharp edges or projections, facilitating de-nesting and automation for larger scale growers.

Designed with a dual-drainage system to ensure optimal air/water exchange that maximizes plant growth potential. Each container is manufactured with two layers of polypropylene. The interior layer is produced with 100% reclaimed post-consumer plastic, and maintains the grower preferred black color to promote an ideal rooting environment at a better cost. The exterior layer may be customized with any eye-catching color imaginable to help draw attention to a grower's brand.

JānorPot® containers come in an array of colors and can be further customized with labeling and custom printing. Add simple bar codes to make inventory management easier, or print up to 8-color logos and artwork to fully illustrate your brand, merchandise it on the shelf, and drive brand recognition. Full color wrap printing helps display grower branding from any angle. Clean-punched tag slots are standard on select sizes for Big Box compatibility.

Summit's polystyrene filling trays perfectly match our line of round JānorPots® for a complete greenhouse plant potting system. Filling trays come in a wide variety of sizes and configurations to accommodate any number of unique grower needs. They are automation ready for easy filling, helping to reduce greenhouse labor costs.

tag slot

How can Summit's 3D Systems technology benefit your operation?

3D Systems® container and filling tray systems were carefully designed to provide advantages in greenhouse production, retail and branding— saving you time, money and ensuring branding/retail info is front-faced. Remember the 3 “D”s:

Direction • Dimension • Display

Tagging

Direction Direction Direction Direction Direction Direction
 Direction Direction Direction Direction Direction Direction
 Direction Direction Direction Direction Direction Direction

Take advantage of better efficiency in tagging!
 As the 3D Systems® container only fits in its tray one way, the tag slot is always right where you need it— Front and center. Clean-punched tag slots make insertion fast and easy.

Labeling

Direction Direction Direction Direction Direction Direction
 Direction Direction Direction Direction Direction Direction
 Direction Direction Direction Direction Direction Direction

A labeling dynamo!
 For labeling operations, low rider trays offer plenty of space for on-site application — or have Summit pre-label your product! Once inserted into the tray the label automatically faces forward, for avd consistent merchandising look on the rack that stays put. Additionally, the sides and rear of the container can accept labels for increased flexibility!

Branding/Decorating

Display Display Display Display
 Display Display Display Display
 Display Display Display Display

The flat face of the container can accept large adhesives, offering you:

- Large brand messaging
- High quality flexographic printing
- Options for creative effects and materials that grab attention
- Longer UV resistance compared to standard container printing
- Label capability on front AND back of container

Space Savings

Dimension Dimension Dimension Dimension
 Dimension Dimension Dimension Dimension
 Dimension Dimension Dimension Dimension

Space savings, galore!
 Maximize the product on your racks with 3D Systems® compared to round pots. Depending on the container size and your racks, 3D Systems® can help you acheive **up to 50% more product on your racks and on the bench.**

SQUARE SYSTEMS

Our square greenhouse pots have become an industry standard with people asking for them by name! The side-fluted NuPots™ offer side and bottom drainage, a Summit innovation that minimizes root circling. Our trademarked Duo™ manufacturing process allows us to offer NuPots™ in a wide range of plant pot colors. And now Summit offers tag slots on our full-pint and full-quart NuPot™ IP pots.

Using our Duo™ manufacturing process, we are able to offer our smooth-sided square pots in a wide range of colors. Square pot systems are an especially popular choice with space-conscious growers, as they can maximize rack space for more efficient shipping.

They are time tested, and grower approved!

Custom SERVICES

Dry-Offset PRINTING

Summit Plastic brought thin-wall thermoformed container printing to the horticulture market, after the introduction of our JanorPot® brand containers nearly 20 years ago. During this time, we've partnered with brands, breeders, retailers and growers to develop successful, long term programs, that drive sales. Our industry-leading print department and designers will guide your project from concept through pre-flight and to production, consulting with you throughout the process to deliver a high-quality, high-impact look, which promotes your branding and marketing initiatives. Design and mockup services are offered to help bring your ideas to life and help sell.

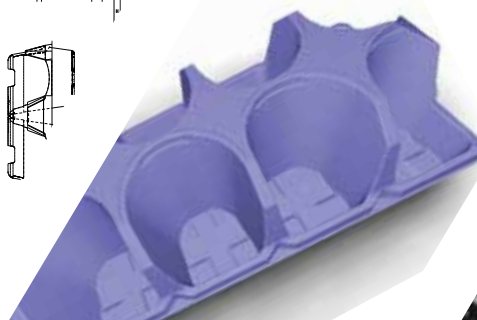

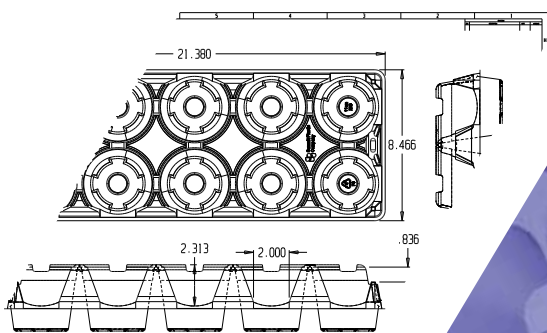

LABELING

Summit Plastic Company offers labeling application services that range from simple, small UPC barcodes, to large, decorative, branded labels that can make your packaging shine! Labels have a UV resistance that can outlast printing and provide flexibility and uniqueness to match your creativity. From advanced materials that can enhance your packaging with eye-catching effects, to peel-away options that can eliminate the need for tags, or be used for coupon strategies—The possibilities are endless!

TOOLING

Have an idea for a product that is not offered in the market or need to tweak an existing product? Summit Plastic Company can help! Our team of engineering and tooling experts—with over 100 years of combined experience in mold-making for the horticulture industry can work with you to design your custom product— From drawings to renderings to prototype and through to production.

Customize Your COLOR

We offer our duo® (black interior, color exterior) JanorPot® containers in an array of established colors and the ability to custom formulate any color to meet your specification. Use colors to promote your brand, to match the flowering variety, or to indicate price points or programs at retail or in production. **Ask us how we can help develop your unique color program!**

Minimums:

Standard Colors = n/a (\$500 minimum order),

Specialty Colors= 30,000/Color 10cmT-19cmT | 11,730/Color 22cmT. Smaller orders can be combined with larger production runs as it fits into production schedules.

Custom Colors= 300,000

9cmH Only available in standard colors

Propagation & Liners

Uniquely designed to promote optimal root structure and growth, take a close look at Summit Plastic Company's **Root Tutor™** and **Root Stepper™** propagation/plug trays to see how they can benefit your crop production.

Root Tutors™ feature star-patterned internal channels force root direction down to meet the large bottom holes to stimulate air-pruning. Bottom holes are cleanly and fully punched for best use in automation equipment.

Root Steppers™ are designed to enhance development of roots, especially the very fine roots necessary to promote absorption of water and micronutrients. The stepped design causes roots to develop into the soil mass instead of circling the cell wall which leads to a large root mass for speedier plant development when placed in larger containers or in the garden.

Rounding out our line of landscape products are our **liners**, which provide an economical starting point for annuals, foliage and woody plants. Available in a variety of cell configurations and features, including fluted cells and community watering channels.

-LINE

10.5" X 21"

X-Line inserts and flats are the "original" and "traditional" — full-sized cells, bigger and deeper, for a more premium presentation in a 10.5" X 21" footprint. This functional product line incorporates all the good basics of product design with the performance standards required by premium growers. X-Line products offer a clear choice when differentiation is the goal. It is simple – deep-rooted plants look better longer and are easier to maintain at retail.

SIZE *WISE*®

10" x 20"

Size Wise® products are built on a 10" x 20" footprint. Size Wise® inserts and flats offer the economy of scale with big design features – ample cell volume, excellent drainage slope and ideal height for precise label application.

Our Market Mate™ packs offer generous cell volumes, pop-up bottoms and a variety of handle insert points to fit your markets' need. Low Rider flats offer maximum space for label application and scanning at retail.

Select sizes of inserts come standard with tag slots, compatible with big-box retail, where required.

RICE HULL CONTAINERS

Composed of natural rice hull fibers, this growing line of garden-friendly rice hull pots contain no heavy metal or oil-based products!

The “breathing” attributes of standard rice hull pots enable air and water to move through – as a result the root system and foliage are more vibrant with increased tolerance to stress from temperature and disease.

Unlike some other bio-options, Rice Hull containers will maintain their structure in most growing conditions for a year or more, and can run through automation equipment!

This renewable resource, is composed of waste from sustainable rice hull fibers, is plantable and 100% bio-degradable. Tested by Ball Horticultural Company and exclusively offered by Summit Plastic Company.

Rice Hull Containers

Rice Pot 3.5"

Dimensions	Dry Vol (cu. In.)	Liq Vol (U.S.)	Liq Vol (met)	Pots/Ctn	Ctns/Skid	Pots/Gaylord	Full bulk Skid
